OUR GOALS

- Mental health is the only branch of medicine where it has developed a line of very exclusive and dedicated specialist case, we intend to address this issue to deepen it and to know which, internationally, are proving to be health systems and more advanced laws for the treatment and respect of human rights worldwide
- highlight those systems that still present legislation that does not adhere to international human rights conventions and legislation.
- Become a reference laboratory for mental health specialists but also for law experts, lawyers and magistrates.
- Promote the development of good practice on mental health and justice in mental health, worldwide.
- Promote actions to close the judicial psychiatric hospitals in favor of facilities and healthcare pathways for the treatment of people with problems of justice.
- Promote distance learning, events, meetings, etc. to promote joint discussion of mental health and justice.
